

Local-first DM-to-delivery walkthrough

Follow the complete golden path, then inspect every decision and event.

1

Trigger with GUIDE

Open DM Studio and send GUIDE. The configured campaign keyword selects the pitch and records campaign attribution.

2

Qualify without pressure

Reply with a clear signal of interest. The deterministic flow chooses the qualification stage and keeps its reason inspectable.

3

Checkout with a snapshot

Continue to checkout, use LAUNCH20, and create an immutable price and discount snapshot tied to the conversation session.

4

Deliver and measure

Open the delivered file, then inspect Orders and Analytics for the event-backed funnel, revenue, and campaign trail.
